

Vandex introduce the CEMLINE range for the UK market

Vandex has chosen Bluebay as its launch partner to introduce its range of Waterproofing and Concrete Protection products into the Potable Water Industry.

This year Vandex, celebrates 70 years of providing innovative technology and products for preventing the penetration of water into concrete, and with the rapid growth for the need of certified products and system for the protection, repair and rehabilitation of potable water structures Vandex has launched the CEMLINE range.

Products in the CEMLINE range are DWI and WRAS listed.

Bluebay have been appointed by Vandex to provide the Potable Water Market sector with Vandex & CEMLINE stock availability and local technical service & support throughout the UK, supported by the UK based Vandex team and the extensive services of the International Vandex Technical Service & R&D Department.

CEMLINE products are easy to apply. The finished surface will achieve the highest standards for the coating of drinking water tanks. Continuous quality control, secure high and uniform quality, assuring products will perform in accordance with product literature if applied accordingly.

Approved stockist of
