## **Brickwork Central Specialist Technical Support Includes:**

### **Expert Advice**

Our Brickwork Central Team has an in-depth specialist knowledge in the construction industry, and is able to design solutions to meet your specific requirements.

Assistance can range from simple guidance or advice on standard product selection to a fully computerised design service.

### **Specification**

We offer a comprehensive specification design service to Architects, Structural Engineers, Developers, Main Contractors and Brickwork Sub-Contractors.

Our experienced technical design team will be pleased to assist with any requirements for restraining or supporting masonry and stonework, and provide solutions in agreeable formats to suit the design brief.

### **Re-Specification**

Bluebay is able to re-specify its products in lieu of other manufacturers' products. Full technical assistance and supporting information is provided as necessary.

### **Detailed Design Proposals**

Our Brickwork Central Team are always on hand to provide value engineered solutions, and our experienced staff will advise on the most cost effective design for any given situation.

We are available to work with the clients design team to develop detailed design proposals, supported by design calculations, specification clauses and comprehensive working details or drawings as required.

Our technical design staff are also available to provide assistance at any stage of the design process and are available to attend office or site meetings as required.

Bluebay offer a comprehensive range of specialist Civil Engineering & Construction Products delivered nationwide from our network of branches, Call us today for a quotation.
